

About Us

We are a progressive company engaged in designing, developing and manufacturing customised automation and motion control solutions with various ranges of PMDC and BLDC motor driven with precision gearboxes for multiple applications.

BLmax has domain expertise and collective engineering knowledge to offer customized, state-of-the-art engineering solutions.

Mission

To be a world-class preferred source for automation and motion control products through innovation that enhances value proportion to our customers. To give personalised engineering support for creating a sustainable, profitable organisation that benefits all customers.

Vision

To be a highly recognized global company in the future for motion products by delivering customized solutions for the Indian and Global markets that will exceed our customer's needs and expectations.

Precision motion products manufacturing

- Innovative customised solution provider for motion products
- Linear Actuators
- DC & BLDC motors, controllers and drivers
- Lifting mechanism
- Design development and prototype solution

We help to grow your business

Cater to small and medium volumes, BLmax is 100% subsidiary of YOTO Engineering Solutions, a precision component manufacturer and global supply chain expertise.

BLmax Motor Pvt. Ltd

We Are Innovative

Linear Actuators

Mini linear actuator

Geared PMDC motors

Un geared PMDC motors

Tyre inflators

Motorized screw jack

Brushless DC motor

Hydraulic gears

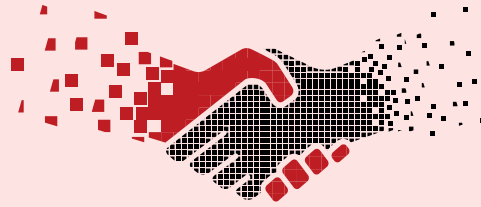

Pneumatic cylinders

Worm screw jack

Why Choose Us

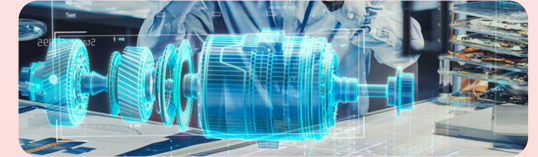

We at **BL Max Motors** are proficient in engineering, design and manufacturing of innovative smart compact & robust solutions & products to make life easier. Our strengths are modern technology, industry standards, timely and quality deliveries, and an experienced workforce.

CORE VALUES

- Value Proposition
- One stop shop, driving supplier reduction and reduction in transaction cost
- Flexible team supports short term and Long terms needs in uncertain and ambiguous procurement world
- Simplified Delivery model for customers with Program management tools
- Driving assured savings of 20-40%
- High speed new product development
- Dedicated customer support: Back office, Sourcing and Quality experts
- Risk mitigation ensured while transition from other supply partners
- Customized solution for Spend Management and Supplier Management with specialized tools

Our Services

Innovative Engineering

Strategic partnership with customer for product design, development and manufacturing practising sustainable engineering, reliability testing and other engineering services in the process. We follow international quality standard like APQP, PPAP& 6 Sigma applicable to automotive product development process.

CAD Modelling

Use of 3D solid modeling software for part & product design for sheet metal ,plastic & mold design with mold flow analysis. Tools & Jig design .Custom PCB design

Design Analysis

Use of software tools for following analysis structural, thermal, CFD & Mold flow & time dominant analysis.
